Amylase Responsive – Curry Sauce

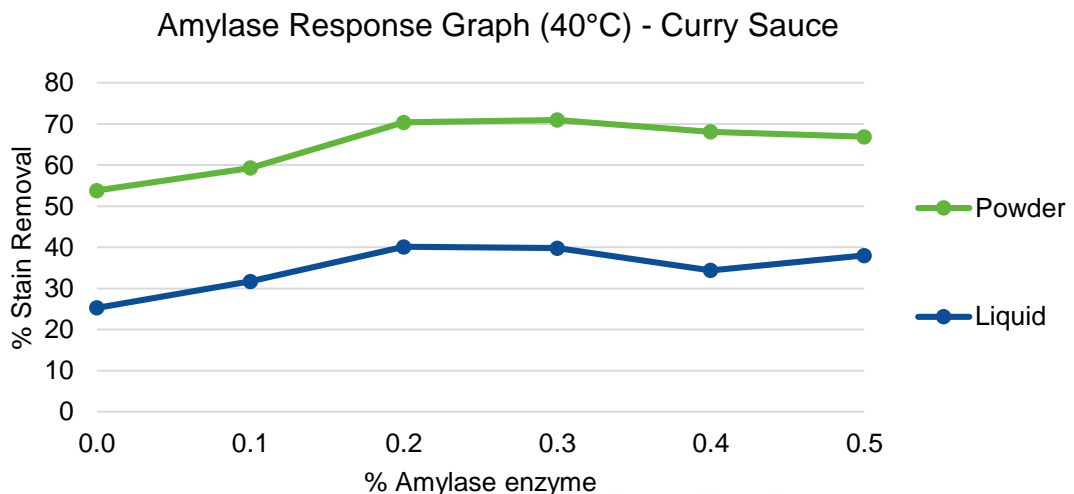

Warwick Equest Limited
Unit 55, Derwentside Business Centre
Villa Real, Consett
County Durham, DH8 6BN
United Kingdom

The level of Amylase enzyme response shown by natural stains supplied by Warwick Equest, was evaluated by performing a series of wash tests. These were done under European conditions using commercial non-bio powder and non-bio liquid detergent products.

Wash Conditions:

- Instrument: European Washing Machine, Miele W487
- Temperature: 40°C wash program
- Programme: Normal wash, Cotton Cycle
- Conditions: Total detergent dose 11.67 g/l (powder), or 13.08 g/l (liquid)
- Ballast: 3.5Kg clean ballast load
- Swatches: 5cm circular stains on 100% white knitted cotton

A significant Amylase response and stain removal is exhibited as Amylase enzyme dose is increased.
