Carpet Monitor

Warwick Equest Limited
 Unit 55, Derwentside Business Centre
 Villa Real, Consett
 County Durham, DH8 6BN
 United Kingdom

The level of stain removal response shown by natural stains supplied by Warwick Equest, was evaluated by performing a series of stain removal tests on carpet using a Brand Market Leader and Own Brand carpet cleaning products. A standard methodology was followed for both products.

Results shown below are for a multi-responsive set of 5cm circular stains on 100% polypropylene carpet. The stains were treated using commercial products and following the recommended instructions of use. The level of stain removal and variation in results generated will depend on the methodology devised. Other stains may be applied/supplied upon request.

The stains show positive levels of residuality and thus aid product differentiation during testing.
